CYBERSECURITY ANALYST | VAPT | NETWORK & CLOUD SECURITY | INCIDENT RESPONSE

Aspiring Cybersecurity Analyst with a BCA in Computer Applications and hands-on experience in penetration testing, vulnerability assessment, and threat analysis through internships, projects, and CTF challenges. Proficient in tools like Wireshark, Burp Suite, Nmap, Metasploit, Splunk, and Nessus. Experienced in simulating real-world attack-defense scenarios, analyzing OWASP Top 10 vulnerabilities, and applying secure coding practices. Enthusiastic about contributing to security operations and continuous learning in the evolving threat landscape.

TECHNICAL SKILLS

Security Tools: Kali Linux, Metasploit, Wireshark, Burp Suite, Nmap, Nikto, John the Ripper, Splunk, Nessus, WPScan

Cybersecurity Concepts: OWASP Top 10, VAPT, Digital Forensics, Threat Analysis, API Security, Secure Coding, Phishing & Malware Analysis, Incident Response

Networking: TCP/IP, DNS, Network Communications, Firewalls, Web Server Architecture

Operating Systems: Windows, Unix/Linux (Ubuntu, Kali), Virtualization Tools
Databases: SQL, MongoDB

Programming & Scripting: Python, C, C++, Java, JavaScript, PHP, HTML, CSS

Professional: Problem Solving, Report Writing, Team Collaboration, Time Management

INTERNSHIP EXPERIENCE

Ethical Hacking Intern — Drop Organization (Virtual) Aug 2025 – Present

- Performed penetration testing with Nmap, Burp Suite, and Metasploit, identifying 15+ system and application vulnerabilities.
- Conducted threat analysis and recommended remediation strategies to reduce attack surface.
- Designed incident response workflows and collaborated with peers to strengthen overall defenses.

Cybersecurity Analyst Intern — Tata STRIVE, Navsari Dec 2024 – Mar 2025

- Executed vulnerability assessments using Wireshark, Kali Linux, and Splunk in lab environments.
- Enhanced phishing awareness, reducing simulated susceptibility by 20% through user-focused security measures.
- Improved incident detection by 30% through log analysis and monitoring exercises.
- Prepared professional security reports, showcasing findings and recommended countermeasures.

EDUCATION

Bachelor of Computer Applications (BCA)

Naran Lala College, Navsari — 2021–2024

PROJECTS

CodeGuard – Source Code Encryption Utility

- Developed a selective encryption tool in Python for source code protection, securing critical modules while reducing risk of unauthorized access by 40%.

Web Application Penetration Lab — Local Brute Force Simulation

- Conducted brute force attacks on a test login system to evaluate weak authentication. Provided actionable recommendations for stronger security policies

Hotel Management System (Secure Web App)

- Built a booking system with PHP, JavaScript, and MongoDB, integrating secure authentication to prevent unauthorized access.

BMI Calculator (Python)

- Designed a BMI calculator with input validation and secure coding practices, demonstrating fundamental programming and data handling skills.

CERTIFICATIONS & WORKSHOPS

- **Cybersecurity Analyst Training** — Tata STRIVE, 2025
- **Ethical Hacking (Workshop)** — Drop Organization, 2025
- **IBM Workshop** — AI & Cloud Computing, 2024

ACHIEVEMENTS & HACKATHONS

- **Participant — TCS HackQuest (CTF Challenge):** Solved challenges in cryptography, forensics, and web security.
- **Volunteering — IBM 3-day Workshop:** Hands-on exposure to AI, cloud, and data analytics for innovation and efficiency.
